

ABOUT ME

Solution-focused **iOS Technical Lead & Team Lead** with 12+ years of experience delivering scalable, sleek, and user-friendly mobile solutions across the Apple ecosystem (iOS, tvOS, watchOS). Specialized in high-throughput video streaming architectures (AVPlayer, FairPlay DRM, HLS), cross-platform mobile frameworks, full lifecycle SDLC management, automated CI/CD pipelines, and AI-assisted engineering workflows.

TECHNICAL SKILLS

OTT & Video Domain

- AVPlayer & AVQueuePlayer
- HLS Media Streaming & ABR
- FairPlay DRM Security
- Google IMA SDK (CSAI/SSAI)
- Conviva QoS & QoE Analytics
- Live Sports Streaming Operations

Languages & Core

- Swift, Objective-C, C#
- UIKit, SwiftUI, Combine
- RESTful Web Services, GraphQL
- CoreData, NoSQL, XCTest
- MVVM, VIPER, Design Systems

Platforms & DevOps

- iOS, tvOS, watchOS
- Android, Xamarin, Flutter
- Xcode, Git, Jira, Azure DevOps
- Fastlane, Jenkins, SwiftLint
- OneTrust, MixPanel, Braze

AI & Innovation

- Claude, ChatGPT, GitHub Copilot

EDUCATION & CERTS

B.E. Information Technology (2009–2013)

Sardar Vallabhbhai Patel Institute of Technology, GTU

Essential Developer Certification (Jun 2024)

Design Systems & System Modularity Architecture

HONORS & AWARDS

- Tech Innovation Award (2026):** Zee Entertainment streaming contributions.
- Shree Jaydeepsinhji Award:** Outstanding Sports Person of the Year (Yogasan).
- National Champion:** Gold & Silver Medals in 50th & 51st National School Games.

PROFESSIONAL EXPERIENCE & MAJOR PROJECTS

Zee Entertainment (Zee5) — Team Lead / iOS Tech Lead

01/2023 – Present

Previously Senior Software Engineer | Bangalore, India

- Lead the end-to-end engineering and architectural strategy for Zee5 Apple TV and iOS applications, serving millions of users.
- Define core architectural principles ensuring modular reusability, fluid scalability, and stable code layers across iOS and tvOS.
- Architected custom AVPlayer/AVQueuePlayer wrappers to process protected HLS streams with multi-language audio, contextual subtitles, and dynamic bitrate adaptive rendering.
- Managed core video delivery technology for live streaming sports events (UPKL Tournament dry runs), achieving high availability and low buffering ratios.
- Integrated enterprise FairPlay DRM pipelines and Google IMA SDK for smooth ad insertion cycles without interrupting playback state.
- Embedded Conviva and MixPanel real-time telemetry to track QoS/QoE metrics (Time-to-First-Frame, Bitrate Drops, Stall Rates).
- Spearheaded OneTrust SDK integration on tvOS for global privacy compliance management and co-architected the Apple TV Kids Profile features alongside QA teams for automated validation runs.
- Engineered single-click user authentication utilizing a multi-peer connectivity protocol layer between mobile iOS devices and tvOS.

Featured Project: Zee5 OTT Platform (iOS & Apple TV)

Provides a seamless video streaming experience playing protected HLS streams with multi-language audio toggles, contextual subtitles, advanced search arrays, and automated recommendations. Features Firebase for remote configuration and custom Compositional Layouts for dynamic content feeds.

Technologies: Swift, tvOS, iOS, AVPlayer, FairPlay DRM, HLS, Google IMA SDK, Conviva, MixPanel, Compositional Layout, OneTrust, Multi-peer Connectivity.

Invaria Tech — Senior Software Engineer

05/2020 – 12/2022

Bangalore, India

- Managed an engineering squad delivering consumer IoT Bluetooth hardware companion software for iOS and watchOS.
- Built interactive, reactive layouts using SwiftUI and Combine frameworks to monitor and control live hardware states.
- Engineered automated CI/CD pipeline workflows utilizing Fastlane tools and GitHub Actions for streamlined deployment.

Featured Project: Willow Pumps (Smart IoT Hardware Suite)

A hands-free smart pump companion suite allowing live hardware state controls (play, pause, suction adjustments) via Bluetooth Low Energy (BLE) alongside cloud engagement matrices handled by Braze. Built standalone Apple Watch companion app to track sessions, historical data, and live controls.

Technologies: Swift, CoreBluetooth (BLE), MVVM, SwiftUI, Combine, watchOS, Fastlane, Braze, Firebase Remote Config, Unit Testing.

Datamatics Pvt Ltd / Schneider Electric — Sr. Software Engineer

06/2019 – 05/2020

Bangalore, India

- Partnered with Schneider Electric to build secure Bluetooth Mesh industrial app environments based on SIG and SDI specs.
- Engineered mesh communication protocols enabling multi-device control across industrial switches, dimmers, and shutters.

Featured Project: BLE Mesh Industrial Control App

Industrial app based on mesh topology via BLE allowing many-to-many device communication over long distances. Operates switch, dimmer, and shutter devices where publisher devices control client hardware across SIG/SDI specifications.

Technologies: BLE Mesh, Silicon Labs SDK, VIPER, Jenkins, HockeyApp, SwiftLint.

PERSONAL ATTRIBUTES

Self-Learner, Disciplined, Flexible, Problem Solver, Result Oriented.

LANGUAGES

English, Hindi, Gujarati (Native)

Capgemini India — Associate Consultant

08/2017 – 05/2019

Bangalore, India

- Handled enterprise client requirements and delivered native/cross-platform solutions integrated with Microsoft Azure cloud backends.
- Engineered enterprise GIS map tracking solutions utilizing ArcGIS Runtime SDK with Microsoft Intune MDM deployment.

Featured Project: Enterprise GIS Map Tracking App

Provides offline map packages (.mmpk) downloaded from ArcGIS Enterprise portal. Enables field technicians to locate work orders, switch building floors dynamically, inspect layer/space details offline, and track spatial points. Delivered via MS Intune.

Technologies: Xamarin.Forms, OAuth2, ArcGIS Runtime SDK, Microsoft Intune MDM.

Matrix Comsec Pvt Ltd — Senior Software Engineer

10/2014 – 08/2017

Vadodara, India

- Architected surveillance and attendance tracking applications for enterprise security infrastructure across iOS and Android.
- Processed concurrent IP camera feeds through custom multi-threaded FFmpeg decoders and OpenGL hardware acceleration layers.

Featured Project 1: Cosec APTA (Time, Attendance & Security Suite)

Enterprise time and attendance app communicating with COSEC enterprise servers. Features location-based auto-punching, daily/monthly summaries, cafeteria management, leave/tour tracking, and activity monitoring across all screen sizes and orientations.

Technologies: Xamarin.iOS, Android, HTTP REST APIs, NoSQL File Storage & Cache, Geofencing, Nested ViewPager.

Featured Project 2: Satatya Vision & Satatya Sight (Video Surveillance)

Enterprise video surveillance platform connecting with HVR, NVR, and DVR systems to monitor live IP camera streams from MATRIX SATATYA SAMAS servers. Renders dynamic 4x4 camera grid views with real-time gesture controls (pan, zoom, tap) utilizing OpenGL for iOS and SurfaceView for Android.

Technologies: Xamarin, Sockets, FFmpeg Decoders, Multithreading, OpenGL, SurfaceView, Custom UI Widgets.

Webmyne Systems — Junior iPhone Developer

04/2014 – 10/2014

Vadodara, India

- Shipped iOS applications from scratch through full SDLC (Zero to launch), strengthening foundational MVC patterns, CoreData memory safety, and UI design.
